Pricing Rationale
Seasonality: shoulder-to-high season demand is likely supporting firmer pricing.
Day pattern: the requested stay starts near a weekend, which can compress transient inventory.
Inventory posture: the agreement was captured under NLRA (Non-Last Room Availability), which materially affects pricing flexibility.
Concessions offset: Breakfast included, Complimentary Wi-Fi helped improve total trip value even if the base rate did not move further.
Market context: no major citywide event or extraordinary demand signal was captured in the workflow.
Weather or temperature signal: no weather-driven pricing adjustment was explicitly identified.
External risk factor: no geopolitical or extraordinary external disruption was explicitly identified.
